

Delivery Information

Customers have two options when setting up an online shop with regards to delivery of orders placed.

Option 1

The customer decides to have all orders delivered to one central address. The customer needs to provide ADM with this address. The customer is then responsible for distributing the orders to the individuals that have placed orders. This option if chosen is free.

Option 2

Orders are dispatched to an individuals' address. There is a surcharge for this service which is payable at check out by the individual ordering.

Generally the postage charge will be £5.95 for all orders under £100.00 and delivery will 2-3 days after the postage date.

For orders above £100.00 postage will be free and the order will be sent out on a next day courier service.

When setting up the online shop the customer needs to inform ADM which option is to be used. Only one of the options above can be chosen.
